## + About EMF

EMF is a Financial Modelling Consultancy firm specializing in Financial Modelling Automation and Training. We have developed highly sophisticated yet simple to use proprietary **Financial Modelling Automation Software**, that has challenged traditional methods of modelling.

We, at its core, are dedicated in imparting the years of experience and knowledge that we gathered to the newest going-to-be professionals with the latest and best industry practices. So that they are ahead of times and beat the ever-growing competition with ease.

# + Why Financial Modelling Training

- ✓ **Excel proficiency**  
Almost all industries and sectors require use of Excel whether it is analysis, reporting and calculations, it is the backbone of many businesses and being proficient in excel helps claim jobs with ease.
- ✓ **Finance & Accounting**  
Without Finance & Accounting concepts it is not possible to get finance-based job. We teach finance concepts where students learn theoretical concepts through financial modelling.
- ✓ **Financial Modelling**  
With the advent of data driven decisions, financial modelling has come to the center of things. Rarely any deal or transaction goes without modelling in some way or the other.
- ✓ **Dashboarding / VBA / Power BI**  
We also introduce other technologies to students which aid in analysis and teach how to build graphs and charts, sensitivities and scenarios.
- ✓ **Wide-Spread Usage**  
Financial modelling is now used across various industries like Private Equity, Portfolio Management, Credit Analysis, Banking, M&A, FP&A, Transaction Advisory, Due Diligence, etc.
- ✓ **Certifications & Placement Assistance**  
We provide block-chain validated certificates to deserving candidates who have cleared our tests and provide placement assistance for getting the right job.
